Users are: Admin, Coach and Visitors

As an admin, i want to be able to be in control, so that i can isolate users and situations

As a coach, i want to be able to upload meets for athletes, so that they are aware of events.

As a visitor, i want to be able to view general race events and stats, so that i can view up-to-date information.

Managing db

Uploading db

Actor

In control of everything below

add/view athletes

view athletes personal data

Coach

view graph of athlete progression

view event race time by time

Visitor

view general race stats
